🔗 LeetCode

Summary

A fresher Computer Science Engineering student with hands-on experience in Generative AI, Retrieval-Augmented Generation (RAG), conversational AI, Large Language Models (LLMs), backend API development, and Machine Learning fundamentals. Experienced in building AI-powered applications using Python, REST APIs, vector databases, and modern software engineering practices. Familiar with AI Agents, AWS cloud concepts, CI/CD workflows, and MLOps fundamentals. Passionate about developing scalable AI solutions and continuously learning emerging technologies..

Skills

Programming Languages: Python, C++, SQL, JavaScript, HTML, CSS

Machine Learning: Regression, Classification, Clustering, Deep Learning Fundamentals, Model Evaluation, Data Preprocessing, Feature Engineering, NLP

AI Technologies: Generative AI, LLM Integration, Prompt Engineering, Retrieval-Augmented Generation (RAG), Sentence Transformers, FAISS

Python Libraries: NumPy, Pandas, Matplotlib, Scikit-Learn (Basics)

ML Frameworks: TensorFlow (Basics), PyTorch (Basics), Scikit-Learn

Backend Development: Flask, REST APIs, Streamlit, SQLite, API Integration

Cloud and DevOps: Docker, Kubernetes (Basics), CI/CD Concepts, AWS Basics, Azure Basics, GCP Basics

Software Engineering: Git, GitHub, Version Control, Testing, Deployment, Coding Best Practices

Data Engineering Concepts: Data Pipelines, Structured and Unstructured Data, Data Warehousing Fundamentals

Development Tools: VS Code, Android Studio, Supabase, Streamlit Cloud, Unreal Engine

Projects

AI-Powered Software Support Chatbot | *Python, Flask, SQLite, Ollama, RAG*

- Developed an AI-powered conversational chatbot using Retrieval-Augmented Generation (RAG) and Large Language Models (LLMs).
- Implemented document ingestion, semantic search, and vector database retrieval using Sentence Transformers and FAISS.
- Built backend REST APIs using Flask for AI inference, document processing, and user authentication.
- Integrated Ollama-hosted LLMs for contextual response generation and conversational AI workflows.
- Applied software engineering best practices including modular architecture, version control, debugging, and deployment.
- Designed scalable document processing pipelines for structured and unstructured enterprise data.
- **Project Link:** chatbot1327.streamlit.app

Driver Drowsiness and Distraction Detection System | *Python, ML Libraries, Streamlit, numpy, SQLite*

- Developed a real-time driver drowsiness and distraction detection system using computer vision and machine learning techniques.
- Implemented facial landmark detection to monitor eye blink rate, yawning, and head movement for fatigue detection.
- Integrated an automated audio alert system to improve driver safety during distraction and drowsiness events.
- Applied data preprocessing and real-time inference techniques for continuous monitoring.

AI Language Translation Tool | *Python, Streamlit, NLP, Translation API*

- Developed an AI-powered multilingual language translation application capable of translating text across multiple languages through an intuitive web interface.
- Integrated translation APIs and Natural Language Processing (NLP) techniques to provide accurate, real-time language translation with automatic language detection.

- Designed a responsive Streamlit-based frontend with efficient backend processing for seamless multilingual communication.
- Implemented clean, modular Python code following software engineering best practices for maintainability and scalability.
- **Project Link:** [GitHub Repository](#)

Hackathons & Competitions

TCS CodeVita - Season 13	2025
<i>Round 1 and Round 2 Qualified</i>	
- Achieved competitive ranks in one of the world’s largest coding competitions.	
- Round 1 : Rank 7410	
- Round 2 : Rank 386	

QHills Hackathon – Satara	Aug 2025
<i>Team: Nova</i>	
- Developed an AI-powered interview simulation platform utilizing OCR and NLP techniques for resume analysis.	
- Integrated Gemini API for question generation and response evaluation using machine learning workflows.	
- Implemented data extraction, preprocessing, and AI orchestration pipelines.	
- Collaborated within a cross-functional team to deliver a working prototype within 72 hours.	

Education

B.Tech in Computer Science and Engineering	2026
<i>Dnyanshree Institute of Engineering and Technology, Satara</i>	<i>Affiliated to DBATU Lonere</i>
Higher Secondary (12th Grade)	2022
<i>Kisan Veer Mahavidyalaya, Wai</i>	
Secondary (10th Grade)	2020
<i>Shree Shivaji English Medium School, Surur</i>	

Languages

Marathi (Native)
Hindi (Fluent)
English (Professional Working Proficiency)
